## SKILLS

Go · Playwright · Adobe Analytics · Looker Studio · A/B Testing · TypeScript · Git · Consulting · Client Relations · Vue.js · GraphQL · Shopify Plus

## EXPERIENCE

### Site Operations Specialist

Mar 2024 - Dec 2025

Bluestem Brands · Eden Prairie, MN · Hybrid

- Managed site experiences, content, promotions and analytics across the Bluestem Brands portfolio.
- Translated UI designs into responsive pages using modern HTML, CSS and JQuery.
- Implemented A/B testing and multivariate testing to optimize user experience and increase conversion rates. Conducted data analysis using Adobe Analytics and Looker Studio to track user behavior and site performance.
- Collaborated with cross-functional teams to develop and maintain site features, including product pages, search functionality and checkout processes.
- Developed internal monitoring applications using Go and Playwright to monitor broken images, links and product pages.

Go · Playwright · Adobe Analytics · Looker Studio · A/B Testing

### Development Consultant

Oct 2023 - Dec 2023

Trexin Consulting · Minnetonka, MN · Hybrid

- Developed custom Salesforce-based ERP systems with in-house software teams using TypeScript, SQL and Gitlab.
- Collaborated with remote consulting teams to resolve client issues and provide technical solutions to business problems.

TypeScript · Git · Consulting · Client Relations

### Software Engineer

Feb 2022 - Feb 2023

Proozy · Edina, MN · Hybrid

- Handled e-commerce operations, including user administration, third-party application integrations and internal business service development across the Proozy's Shopify Plus online portfolio.
- Developed front-end solutions using Liquid, Vue.js and the Shopify GitHub CI/CD Integration. Increased site performance by 50% by implementing responsive images and applying JavaScript best practices.
- Maintained API integrations for third-party vendors hosted on cloud infrastructure with Node.js, Docker and Amazon Web Services.
- Implemented Google Tag Manager and Google Analytics to track user behavior and site performance.
- Designed a custom inventory and order data tagging system to improve product planning, merchandising and warehouse efficiency with the TypeScript, Node.js, PostgreSQL and the Shopify GraphQL API.

Vue.js · GraphQL · Shopify Plus · Liquid · Google Tag Manager · Docker · AWS

### Freelance Developer

Sep 2020 - Present

Self Employed · Minneapolis, MN · Remote

- Support Shopify stores with app integration, theme customizations, data/intentory management
- Designed custom applications, APIs and UIs with Google Apps Script and TailwindCSS.
- Convert Google Sheets data into RESTful API endpoints.
- Collected and transformed JSON data into spreadsheets tables for real time data tracking.

Google Apps Script · Google Sheets · TailwindCSS · REST · JSON

## Mobile Expert

Jun 2019 - Nov 2021

TMobile · St. Louis Park, MN · Onsite

- Managed sales and support for T-Mobile devices/services based on unique customer needs.
- Collaborated with peers, management and specialty leaders across multiple stores to resolve billing issues, achieve sales goals and improve business processes.

Sales · Customer Service · Billing
